Why Are They Failing?

Domain Specific XR: Our Contrarian Bet

○ Specialization V. Generalization

Domain-specific XR devices will succeed by addressing unique industry problems, unlike general-purpose devices.

○ Targeted Value Prop.

Focusing on scenarios where immersion interaction delivers clear advantages over current devices

○ Solving Real Problems

Addressing genuine pain points in specific domains rather than creating solutions in search of problems

Problem Statement

It is *difficult, passive, and disengaging* to watch live sports in a way that captures the excitement that fans crave.

It's also limiting to view the game and data *across separate screens*, without a unified or immersive experience.

Sportsfans Using Multiple Devices

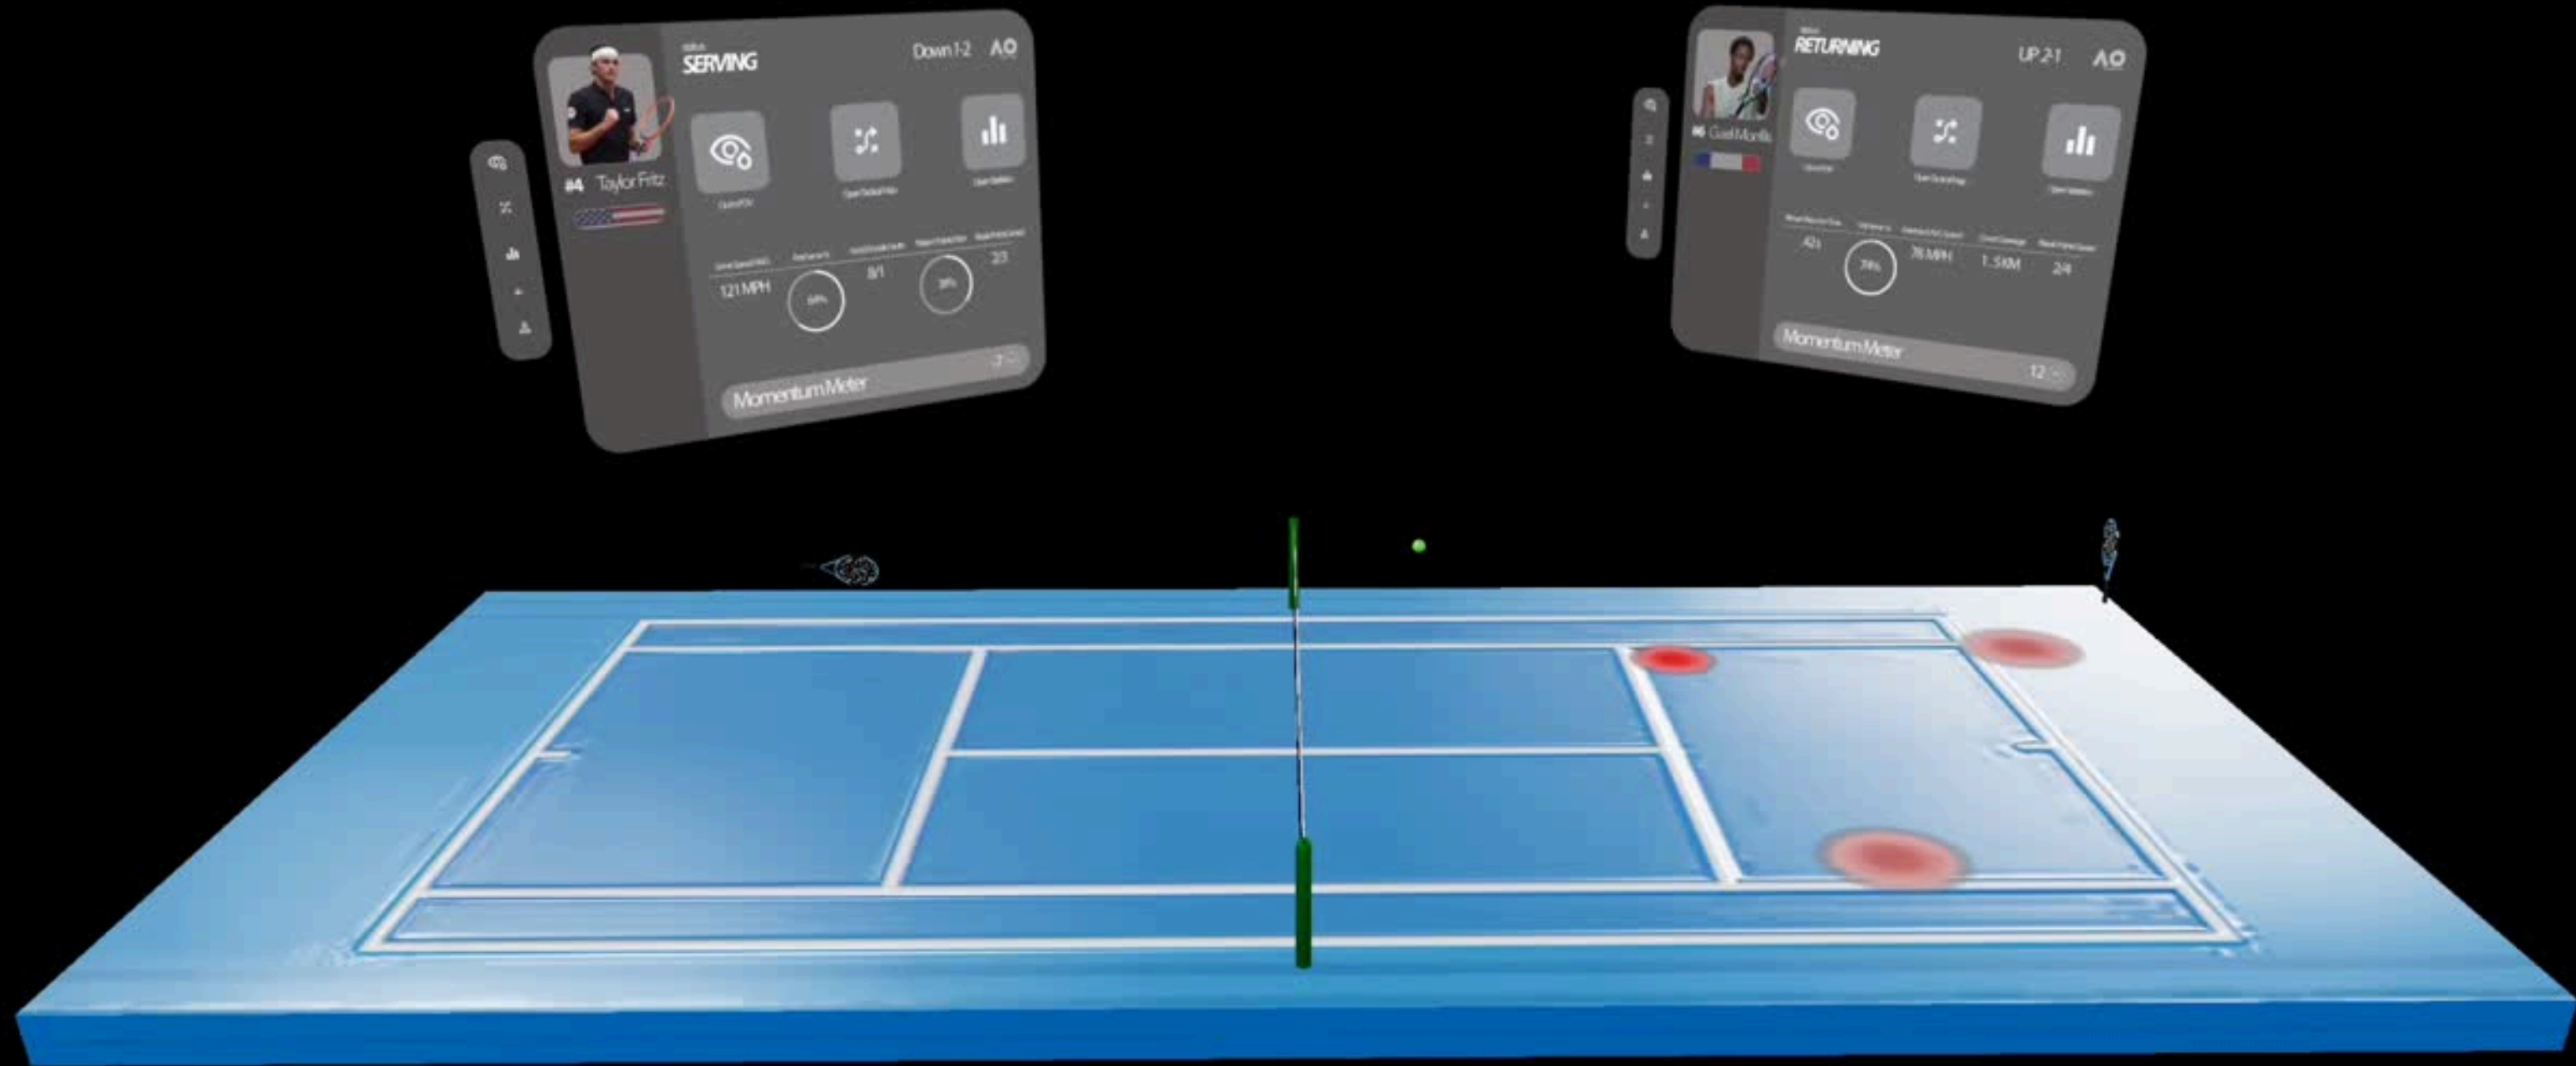

77%

of Americans use other devices to look up stats, watch other games, or track sport's bets.

ArenaTable

A TABLE-TOP AR EXPERIENCE THAT TURNS
LIVE SPORTS INTO IMMERSIVE 3D
SIMULATIONS.

Core Features

1 Real Time 3D Simulation of Live Play

Offering an interactive alternative to traditional broadcast viewing

2 Zoom in on Key Moments

Allowing users to see a specific shot in detail

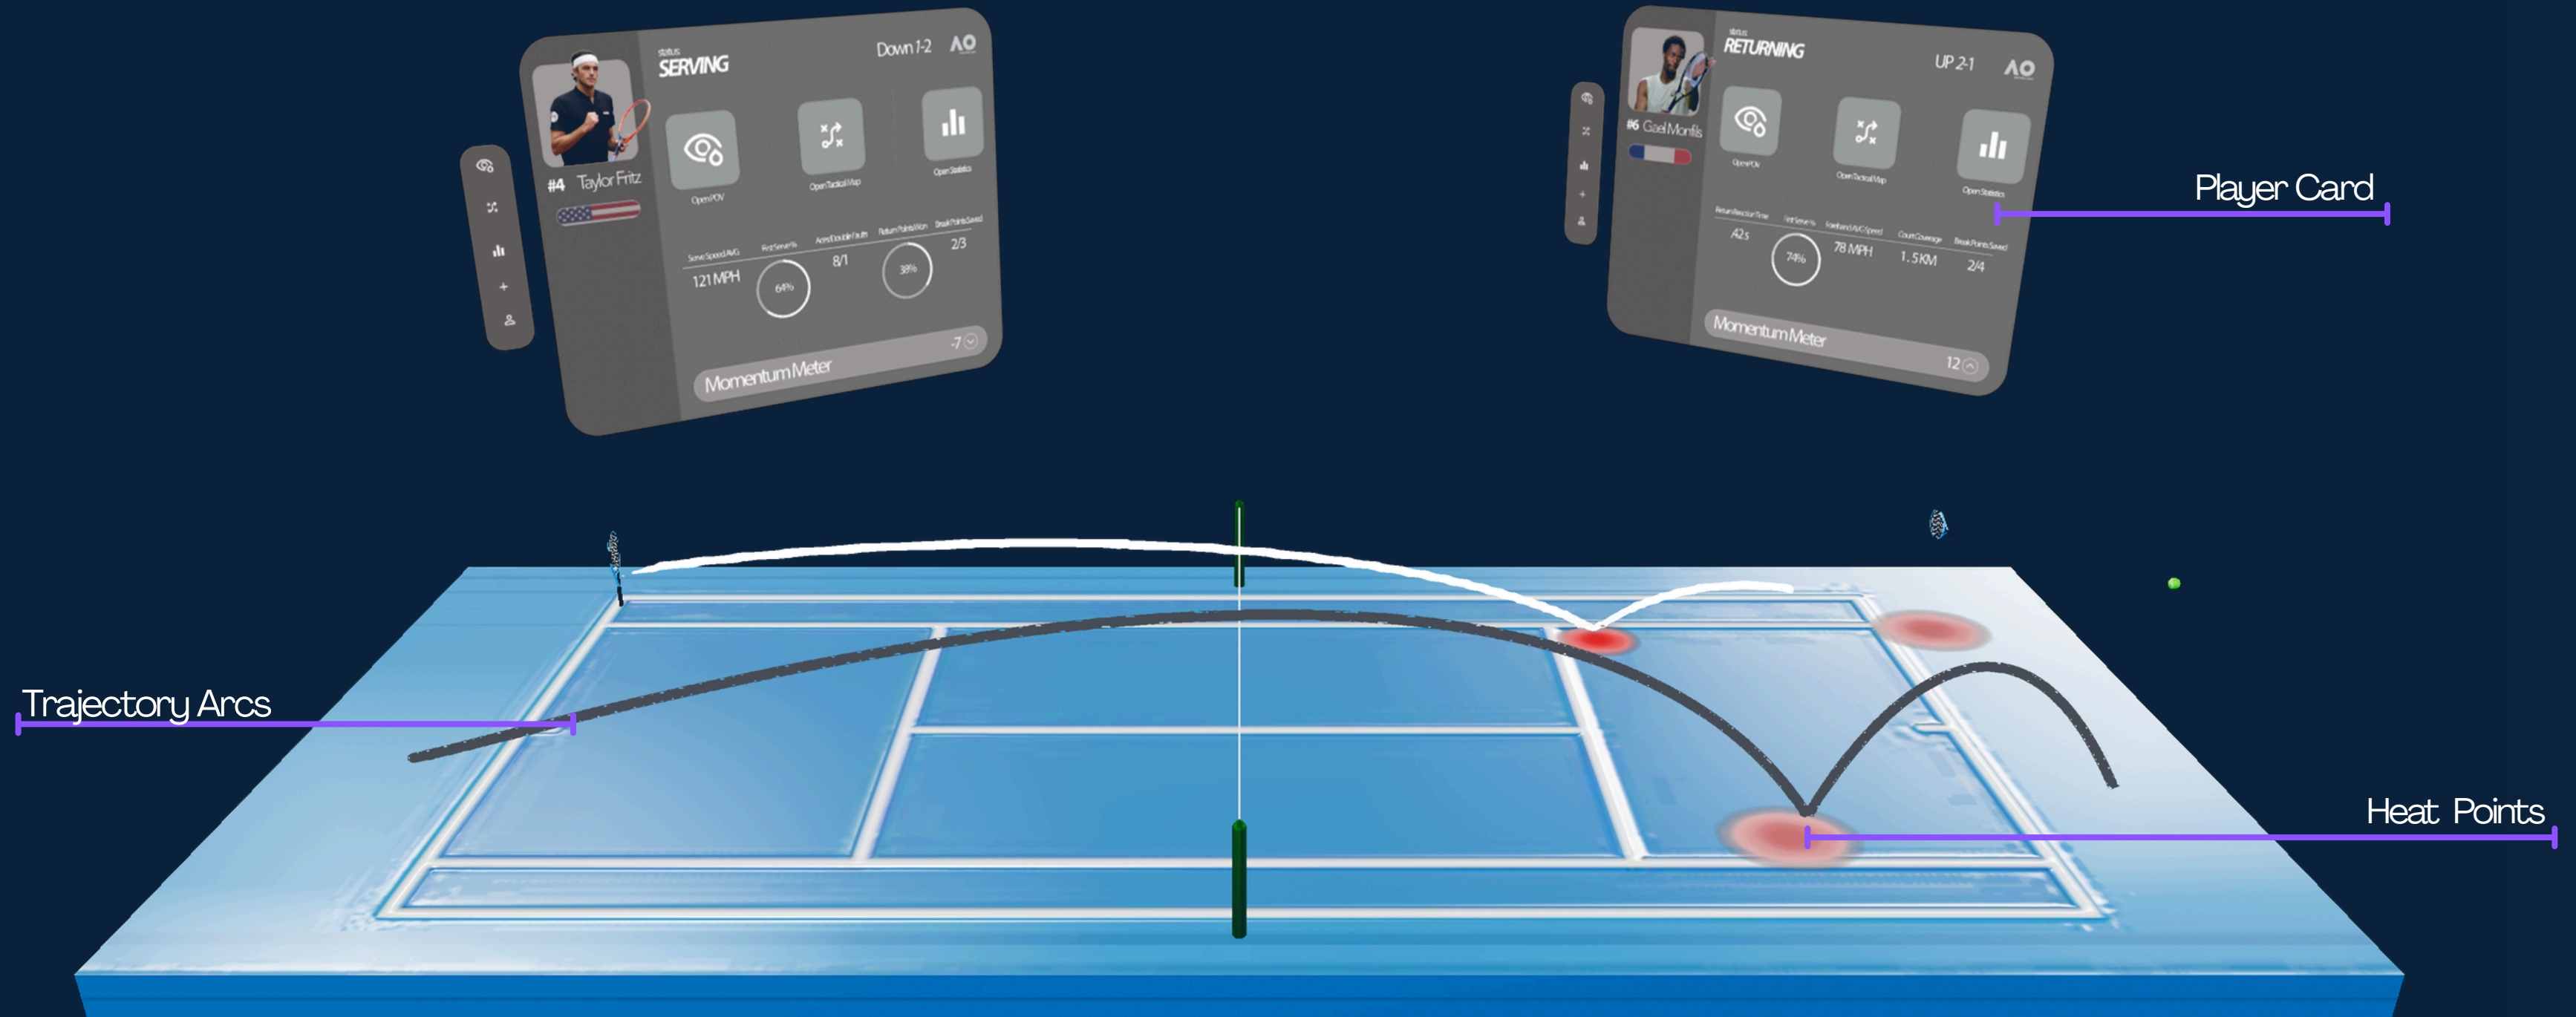

3 Tap to Change Angles

Sideline view, top-down strategy mode, or even a “player-eye” view.

4 Replay

Users can choose when they want to replay key moments of gameplay

Data Visualization

Why Now?

Traditional Streaming Decline

PAID TV SUBSCRIPTIONS DROPPED 27% IN 2024

Source: Business Insider, Parks Associate

Sports Betting & Gamification

30% OF US INDIVIDUALS BETTING ON SPORTS IN THE PAST YEAR DUE TO THE LEGALIZATION OF SPORTS BETTING

Source: Statista

Second Screen Fatigue

VIEWERS ARE TIRED OF CONSTANTLY SWITCHING BETWEEN DEVICES FOR STATS AND COMMENTARY, THEY WANT A SEAMLESS, ALL-IN-ONE EXPERIENCE.
